
Women and Work in Pre-industrial England-Lindsay Charles 2013-03-12 This book surveys women and work in English society before its transition to industrial capitalism in the eighteenth and nineteenth centuries. The time span of the book from 1300 to 1800 allows comparison of women's work patterns across various phases of economic and social organisation. It was originally published in 1985. Several important themes are highlighted throughout the individual contributions in the book. The most significant is the association between home and work. Not only was trade and manufacture in the pre-industrial period carried out in close proximity to domestic life, many household activities also overlapped with commercial ones. The second key theme is the importance of the local social and economic environment in shaping the nature and extent of women’s work. The book also demonstrates the similarity between certain aspects of women’s work before and after industrialisation. The industrial revolution may have made sexual divisions of labour more apparent but their origins lie firmly in the pre-industrial period.

Handbook of Industrial, Work & Organizational Psychology-Neil Anderson 2001-12-20 The globalized nature of work in the new millennium implies that human resource management, psychological theories of personnel and individual behaviour in the workplace have to change and evolve. This volume mainly focuses on theories, techniques and methods used by industrial and work psychologists. A set of internationally renowned authors summarize advances in core topics such as analysis of work, work design, job performance, performance appraisal and feedback, workplace counterproductivity, recruitment and personnel selection, work relevant individual difference variables (cognitive ability, personality), human-machine interactions, human errors, training, learning, individual development, socialization, methods, and measurement.

Industrial Home Work-Emily Clark Brown 1930

Youth and Work in the Post-Industrial City of North America and Europe-Laurence Rouleau-Berger 2003-01 In North-American and European cities, youth live in precarious social and economic conditions. The issue of employment has become a political problem. In this volume, sociological, economical and ethnographical perspectives are used to explain ethnic discrimination, inequalities at school, unemployment and marginalization. Work remains a central value in young peoples' lives who not only are victimized but also try to find escapes. Originally in French, this extended and updated book contains contributions by Enrico Pugliese, Saskia Sassen, Min Zhou, Francois Dubet, Paul Anisef, Paul Axelrod, Ida Susser and others.

Emergency and Permanent Policies of Spreading Work in Industrial Employment-United States. President's Emergency Committee for Employment 1931

Sociology, Work and Industry-Tony Watson 2004-02-24 In the fourth edition of this successful and popular text, Tony Watson explains how the discipline of sociology contributes to our wider understanding of the variety of work practices and institutions, which exist in modern society. The new edition outlines both what has been achieved historically and what is currently being achieved by the sociological study of work, as well as presenting a range of concepts, models and other theoretical ideas that students and researchers can apply to the study of work. Subjects covered include: * how working patterns have changed, and continued to change since the industrial revolution * work organizations * innovations in the structuring of work activities at the enterprise level * the occupational aspects of the organization of work in changing societies * how people experience and cope with the pressures, insecurities and inequalities of a restructured world of work * how challenge and resistance influence the shaping of work in an ever-changing world. Fully updated throughout, this book includes an all-new chapter on the distinctiveness of the sociological perspective along with guidance on the research and analysis of work. It will be essential reading for anybody studying the sociology of work and organizations.

Addresses on Industrial Relations-University of Michigan. Bureau of Industrial Relations 1945

Democracy at Work in an Indian Industrial Cooperative-Richard W. Franke 2018-05-31 The authors tell the story of a democratic workers' cooperative that makes hand-rolled cigarettes, known as "beedis," in the unorganized sector of a fiercely competitive capitalist economy in India. For decades, beedi workers have been among the most exploited and impoverished of India's work force. In 1969, in the southwestern Indian state of Kerala, several thousand workers banded together to form a worker-owned beedi cooperative. The authors argue that their skill and determination, combined with Kerala's generally leftist political culture, allowed them to beat the odds. The cooperative surprised the private sector beedi barons by creating an enterprise that has lasted and prospered, offering the best wages and benefits in the business, while making a profit and contributing to the local economy. The authors analyze the major features of the cooperative, assessing its overall structure, worker-elected management, shop floor democracy, and progress in providing a better life for its worker-owners. Tensions are also discussed, including the complaints of women workers and the need for diversification from tobacco.

Britain's Industrial Future-Liberal Industrial Inquiry (Great Britain) 1928

Gender, Work and Wages in Industrial Revolution Britain-Joyce Burnette 2008-04-17 A major study of the role of women in the labour market of Industrial Revolution Britain. It is well known that men and women usually worked in different occupations, and that women earned lower wages than men. These differences are usually attributed to custom but Joyce Burnette here demonstrates instead that gender differences in occupations and wages were instead largely driven by market forces. Her findings reveal that rather than harming women competition actually helped them by eroding the power that male workers needed to restrict female employment and minimising the gender wage gap by sorting women into the least strength-intensive occupations. Where the strength requirements of an occupation made women less productive than men, occupational segregation maximised both economic efficiency and female incomes. She shows that women's wages were then market wages rather than customary and the gender wage gap resulted from actual differences in productivity.
